From Farm to Global Markets

From Vietnamese plantations to international markets

Export-grade Cavendish bananas supported by controlled cultivation, packing-house handling, cold-chain management and flexible export configurations.

BUILT ON TRUST.
DELIVERED WITH CARE.

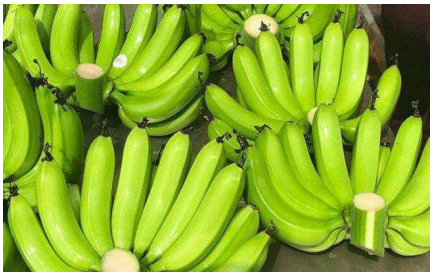

PRODUCT E-CATALOG 2026

Product at a Glance

Premium Vietnam-grown Cavendish bananas for wholesale, retail, foodservice and distribution programs, supported by large-sc
production and year-round harvest planning.

PRODUCT	**Fresh Cavendish Banana**
VARIETY	South American Cavendish Banana
ORIGIN	Vietnam
FLESH	White, sweet
BRIX LEVEL	28-32%
CULTIVATION	Tay Ninh & Dong Nai - approx. 500 hectares
MONTHLY CAPACITY	Approx. 50 reefer containers / 1,000-1,100 MT
SUPPLY	Year-round, staggered production cycles

Cultivation & In-Field Quality Control

Quality begins in the plantation with controlled planting material, biological crop protection and bunch protection designed to support export appearance and consistency.

01 SEEDLING CONTROL

Elite tissue-culture seedlings support strain purity, uniform growth and disease-free planting stock.

02 BIOLOGICAL CROP PROTECTION

Biological pest management, organic bio-pesticides and beneficial microbes are referenced in the production profile.

03 BUNCH PROTECTION

Individual bunch bagging and flower trimming help reduce mechanical damage, insect stings and sunburn.

04 PRECISION FARMING

Automated drip irrigation and fertigation can be tailored to local soil conditions.

Production Scale & Location

A large cultivation base in Southern Vietnam provides access to key transport corridors and major export terminals.

CULTIVATION AREA	**Approx. 500 hectares**
LOCATIONS	Tay Ninh Province & Dong Nai, Vietnam
SUPPLY CAPACITY	50 reefer containers/month (~1,000-1,100 MT)
HARVEST	Consistent year-round availability
EXPORT GATEWAYS	Cat Lai and Cai Mep ports

Year-Round Supply Reliability

Staggered planting and zone-based production planning support continuous harvest availability throughout the year and predict monthly allocation.

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

COMMERCIAL ADVANTAGE

Predictable monthly allocation can support supermarket programs, import distributors and annual supply agreements while reducing dependence on a single harvest window.

Export-Grade Processing & Packing

Post-harvest handling progresses from selection and washing through crown treatment, grading, vacuum packing, pre-cooling and refrigerated transport.

PACKING-HOUSE CAPABILITY

Selection • washing • crown treatment • grading • vacuum packaging • carton packing • pre-cooling • reefer loading

Export Product Specification

Core fruit specifications from the September 2026 production profile. Final buyer specifications should be confirmed before shipment.

CRITERIA	STANDARD DETAILS
Variety	South American Cavendish Banana
Origin	Vietnam
Brix level	28-32%
Commercial grade	Grade A / Grade B
Finger length	17-25 cm
Caliper (diameter)	34-46 mm
Harvest age	9-11 weeks, market/transit dependent
Pest & disease	Free from insects, mealybugs, scale or fungal infection
Natural blemishes	Class A: max. 1-2% total skin defect area
Shelf life - green	30-45 days in cold chain
Shelf life - ripened	7-10 days at 16-20°C retail display

Hand, Cluster & Crown Standards

Buyer programs can be configured by hand or cluster format, with controlled crown condition and standardized green-stage harv

PARAMETER	SPECIFICATION	MEASURING / QUALITY STANDARD
Color stage	Stage 1 - hard solid green	Standard 1-7 ripening chart
Caliper / thickness	39-46 (31.0-36.5 mm)	Measured at middle finger, middle tier
Cluster size (CP)	4-8 fingers per cluster	Clean, uniform cluster shape
Big hands (H)	12-22 fingers per hand	Whole hand intact
Small clusters (CL)	3-5 fingers per cluster	Weight adjustment; max. 10% per carton
Crown condition	Clean 45° cut; firm, green, smooth	Food-grade alum & permitted fungicide treatment

Packaging Specifications for Export Markets

Market packing references from the supplied profile. Final configuration remains subject to buyer specification and destination requirements.

MARKET	SIZE	CARTON	CONTAINER	TEMP
China	4, 5, 6 H	13 kg net / 14.5 kg gross	1,540 cartons - floor loaded	13°C
Korea	CP3, CP5	13 kg net / 14.5 kg gross	1,320 cartons - 22 pallets	13°C
Japan	CP10, CP12, CP14, CP16	13 kg net / 14.5 kg gross	1,320 cartons - 22 pallets	13°C
Middle East	4,5,6 H + 10% 7-8 H / CL	13 kg net / 14.5 kg gross	1,540 cartons - floor loaded	13°C
Russia	4,5,6 H or CP 6-9 fruits	13 kg or 18 kg net	1,540 or 1,200 cartons	13°C
Singapore / Malaysia	4,5,6 H	13 kg net / 14.5 kg gross	1,540 cartons - floor loaded	13°C

Note: carton artwork, exact calibre, hand/cluster mix, palletization and destination-specific phytosanitary requirements should be confirmed in the buyer purchase specification.

OEM / Custom Branding & Packaging

Private-label and buyer-specific packaging can be configured across outer cartons, fruit-level labeling, inner freshness protection and traceability documentation.

1. OUTER BOX & CARTON BRANDING

Full-color Flexo/Offset printing with buyer logo, brand colors, artwork and handling instructions. Custom 5-ply moisture-resistant cartons and ventilation patterns.

2. FRUIT-LEVEL LABELING

Food-grade waterproof PLU stickers with buyer brand, logo, PLU code or QR code.

3. INNER PACKAGING

Vacuum PE bags to manage respiration, protective PE foam dividers and latex-absorbing bottom pads.

4. DOCUMENTATION & TRACEABILITY

Custom GTIN/EAN barcodes, origin labeling, phytosanitary markings and batch tracking codes.

CARTON SIZE REFERENCE

W: 32-40 cm L: 50-60 cm H: 20-25 cm

Net weight options referenced: 7 / 13.5 / 18 kg

Customs & Trade Compliance

A complete export documentation package can be prepared to support international shipments, subject to destination-market requirements.

ITEM	STATUS / REFERENCE
HS code	08039020
Certificate of Origin (C/O)	Available
Phytosanitary Certificate	Available
Bill of Lading	Available
Packing List	Available
Commercial Invoice	Available
COA	Available
KFDA / FDA	Referenced as available in source profile

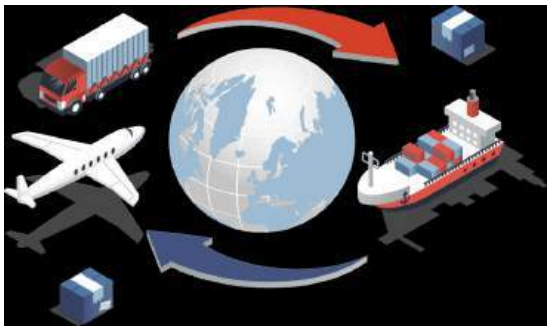

Maximum Residue Limits (MRLs): product is stated as compliant with target-country pesticide regulations. Destination-specific documentation and admissibility should be confirmed before contracting and shipment.

Order-to-Ship Timeline

A coordinated workflow links commercial confirmation, harvest, packing, inspection, customs and port cut-off requirements.

STAGE	REFERENCE LEAD TIME	DETAIL
Order to harvest	5-7 days	From receipt of deposit
Processing & packing	2-3 days	Washing, sorting, vacuum packing and palletizing
Inspection & phytosanitary	24-48 hours	Plant quarantine inspection and certificate issuance
Customs clearance	1-2 days	Local port / border
Stuffing & port cut-off	2 days	Port cut-off referenced 2 days before ETD
MOQ	1 x 40 ft	Batch schedule referenced at 5-10 containers/week

Export Logistics & Commercial Delivery Options

Flexible commercial structures can be aligned to the buyer's destination, shipping term, documentation needs and insurance requirements.

FARM-TO-PORT COLD CHAIN

Temperature-controlled reefer transport from farm to Cat Lai / Cai Mep ports.

EXPORT CLEARANCE

Customs, phytosanitary certificates and port documentation handling.

PORT & TERMINAL

Local terminal handling charges and vessel loading can be included under the agreed commercial term.

SUPERVISED LOADING

Professional staff and equipment support safe container loading at the packing house.

OCEAN FREIGHT

Reefer booking and shipment to the chosen discharge port can be arranged.

MARINE CARGO INSURANCE

Transit insurance can be arranged for CIF shipments.

INCOTERMS: EXW • FOB HO CHI MINH CITY • CFR • CIF

Annual Supply Commitments & Flexible Pricing

Commercial programs can be structured for continuity of supply while allowing market-responsive pricing and secure international payment methods.

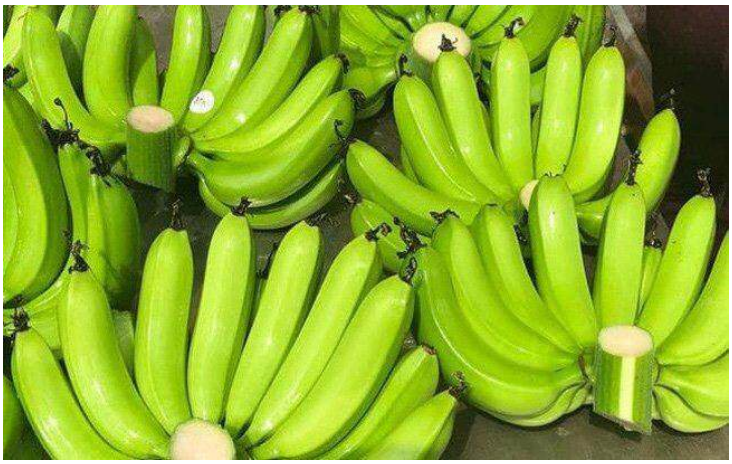

ANNUAL SUPPLY SECURITY	Long-term 1-year contract frameworks can allocate consistent year-round volume for sustainable buyer programs.
DYNAMIC MARKET PRICING	Weekly or monthly price adjustments can be aligned with market trends and agreed commercial formulas.
LETTER OF CREDIT (L/C)	Irrevocable L/C at sight from acceptable international banks for transaction security.
TELEGRAPHIC TRANSFER (T/T)	Advance deposit with remaining balance against agreed shipping documents / Bill of Lading.

BUYER-READY FLEXIBILITY

Destination • calibre / hand configuration • carton size • volume • palletization • Incoterm • documentation

Why Source Vietnamese Cavendish Bananas with VAC?

A buyer-facing export program combining Vietnam-origin supply, controlled handling, market-specific packing and flexible commercial support.

01	Vietnam-origin tropical production base with access to Southern Vietnam export ports.
02	Approx. 50 reefer containers per month / 1,000-1,100 MT supply profile.
03	Field protection, washing, grading, packing, pre-cooling and cold-chain handling.
04	Staggered cultivation designed for consistent year-round harvest availability.
05	Flexible floor-loaded or palletized packing for multiple destination markets.
06	EXW, FOB, CFR and CIF commercial options with export documentation support.
